

MUTHU MARIAPPAN G

Front-End Developer

+91 6382751742 | muthumariappang02@gmail.com | [LinkedIn](#) | [Portfolio](#) | Chennai, India

PROFESSIONAL SUMMARY

Front-End Developer with **3 years of experience** building scalable, production-ready web applications in a **product company**. Proficient in **ReactJS, NextJS, TypeScript, and JavaScript**, with hands-on backend experience in **Node.js and REST API development**. Skilled in **component architecture, Redux state management, and cloud integrations using AWS and KeyCloak (OAuth)**. Experienced in delivering responsive UI and collaborating in **Agile/Scrum** environments. Leverages **AI-assisted development tools** including Lovable and Claude AI to accelerate delivery. Committed to clean code, reusable component design, and continuous performance optimization.

TECHNICAL SKILLS

Frontend: ReactJS, NextJS, TypeScript, JavaScript (ES6+), HTML5, CSS3, Material UI (MUI), Redux, React Hooks, Context API, Custom Hooks, useMemo, useCallback

Backend: Node.js, Express.js, REST API Design & Development, MVC Architecture, JWT Authentication

Databases: SQL, PostgreSQL, Database Schema Design & Connection

AI & Dev Tools: Lovable, Claude AI, Vite, Webpack, Git, Postman

Practices: Agile/Scrum, CI/CD (Continuous Integration & Continuous Delivery), API Integration, Unit Testing (Jest), Code & Data Optimization

Cloud & DevOps: AWS (S3), KeyCloak (OAuth)

PROFESSIONAL EXPERIENCE

Software Developer | Gove Technology, Chennai, India (Product Company)

Feb 2023 – Present (3 Years)

- Architected and developed scalable ReactJS and NextJS applications using code splitting, lazy loading, and SSR/SSG strategies to enhance page load performance.
- Built and maintained a library of reusable, testable TypeScript components using MUI and component-driven architecture, streamlining development across teams.
- Integrated REST APIs with advanced caching, pagination, and server-side filtering to improve data-fetch efficiency across multiple modules.
- Wrote comprehensive unit and integration tests using Jest, achieving high code coverage and reducing production bugs significantly.
- Led code reviews, enforced coding standards, and mentored junior developers and interns to improve team code quality and delivery velocity.
- Collaborated closely with UI/UX designers, backend engineers, and product owners in Agile/Scrum sprints to deliver features on time across multiple product releases.

KEY PROJECTS

BillPay – Invoice & Payment Management System | NextJS, TypeScript, Redux, Material UI

- Engineered bill search, generation, invoice listing, and transaction history modules in NextJS and TypeScript, handling 10,000+ records with pagination and server-side filtering.
- Implemented server-state management using Redux to improve caching efficiency and minimize redundant API calls.
- Expanded reusable Material UI component library with proper separation of concerns to ensure consistent UI across all application screens.
- Improved frontend performance for large datasets through structured error handling, input validation, and data sanitization to maintain high application uptime.

BaaS360 – Business as a Service Platform | ReactJS, NextJS, TypeScript, Node.js, PostgreSQL

- Led end-to-end frontend architecture using NextJS App Router and TypeScript, implementing scalable design patterns and reusable component strategies across 8 modules.
- Integrated secure REST APIs with structured error handling and data validation to ensure reliable API response handling across all modules.
- Applied clean code principles and systematic testing with Jest to improve module maintainability and accelerate bug resolution.
- Collaborated with UI/UX and backend teams for performance improvements, delivering 4 major feature releases on schedule.

EDUCATION

Bachelor of Engineering – Electronics & Communication Engineering (ECE)

Francis Xavier Engineering College, Tirunelveli | CGPA: 8.23 / 10 | 2019 – 2023
